Social work in Santa Cruz

La Salle is an internationally renowned school. It has two projects in the city of Santa Cruz.

Work in a home for children with teenagers aged 18-25 years old

The first project is in a home for children with five to eight teenagers from 18 to 25 years old who have suffered some kind of violence. The idea is that they find, in this home, their path in their life.

We are looking for a long-term volunteer, either a male or a couple with work and life experience who is able to guide the teenagers in their life.

There is no fee for this volunteering: you would live in the house together with the staff and receive free accommodation and food for the time of your stay. Interested? Contact us info@boliviadigna.org !

Work in a home for children with teenagers aged 18-25 years old

The second project is also in a home for children with male teenagers from 12 to 17 years old who have suffered some kind of violence too. The idea is to help them in their education when they are not at school (help with homework, teaching them new skills) but also helping find them their own way in life.

We are looking for educators or persons who would like to work in this home, preferable a male.

There is no fee for this volunteering: you would live in the house together with the staff and receive free accommodation and food for the time of your stay. Interested? Contact us at info@boliviadigna.org

About Santa Cruz

Santa Cruz de la Sierra is Bolivia's commercial center and the capital city of the Santa Cruz department. It is slightly bigger than La Paz and is one of the world's fastest growing cities. Its climate is warm and tropical and has a great wildlife, a busy night-life and interesting culture.
